

TABLE GRAPES

All of these grapes are American varieties which are better suited to our climate. They are slip skin varieties with soft flesh and a distinctive, musky flavor and aroma. Some will also make a nice wine. Please see descriptions for details.

PLANTING: Plant grapes at least 6-8 feet apart with 8-9 feet between rows in well-drained, amended soil. Plant at the same depth as in the pot. Trim vine down to two remaining buds.

CULTURE: Choose a site which is not in a frost pocket, and is parallel to the prevailing winds. Full sun is required to ripen the fruit, so rows are best oriented in a north/south direction. Grapes are adapted to a wide range of soil types, but do require good drainage. Water newly planted vines regularly (1-2 inches of water per week until mid summer); mature vines are deeply rooted and require only occasional water. Watering prior to harvest will increase fruit size. Mulch once a year in spring with aged manure. Too much fertilizer will cause the flower buds to fall off.

STAKING AND PRUNING: Grapes are vigorous growers and need sturdy staking or an arbor to grow on. Pruning will depend on the individual needs of the plant and its location. Please visit the Information desk for more specific pruning information.

CURRENTLY AVAILABLE VARIETIES:

SEEDED

BUFFALO
CAMPBELL'S EARLY
CONCORD
GOLDEN MUSCAT
MOORED
NIAGARA
PRICE
STEUBEN

SEEDLESS

CANADICE
CONCORD SEEDLESS
GLENORA
HIMROD
INTERLAKEN
LAKEMONT
SUFFOLK RED
VANESSA

Rev 01.13.12

BUFFALO	Seeded. Medium size fruit on well filled clusters. Bluish black. Juicy, tender and sweet. Good for fresh eating, preserves and making wine. Ripens before Concord.
CANADICE	Seedless. Large, long, well-filled 6-8" clusters. Medium size, firm grape. Excellent table grape for juice, jellies and wine. Vigorous, productive vines. Keeps long on the vine. Ripens mid-August through September.
CAMPBELL'S EARLY	Seeded. High quality, large clusters of purplish-black fruit on moderately vigorous vines. Ripens 10-28 days before Concord.
CONCORD	Seeded, large to medium sized fruit. The standard American grape for juice, jelly, etc. Skin is purple to black with sweet and tart green pulp. Very productive. Ripens late September. Zone 4.
GLENORA	Seedless. Vigorous variety produces sweet, crisp, flavorful fruit that rates consistently high in taste tests. A favorite for the home garden.
GOLDEN MUSCAT	Seeded. Large, dense, well filled, compact clusters. Large, egg-shaped green fruits maturing to pale golden yellow. Tantalizing aroma. Vigorous, productive vines. Prone to powdery mildew, so prune for good air circulation.
HIMROD	Seedless, medium sized golden fruit in large clusters. Crisp, sweet, juicy flesh. Makes excellent raisins. Moderate disease resistance. Keeps until December. Ripens mid-August. Hardy to -15°F.
INTERLAKEN	Seedless. Medium-tight clusters of small to med. golden fruit with sweet, refreshingly tangy flavor. Vigorous, disease resistant variety ideal for raisins and fresh eating. Self-fruitful.
LAKEMONT	Seedless. Largest, tightest clusters of any seedless grape. Crisp, sweet, juicy, yellowish green fruit. Superior table grape; makes excellent raisins. Vigorous and heavily productive. Ripens 10-20 days before Concord.
MOORED	Seeded. Large, musky, deep red fruit on a very productive vine. Ideal for juice and fresh eating.
NIAGARA	Seeded, large, tight clusters of, light green to white grapes. Tangy, delicate flavor. Top eating variety and makes a distinctive white wine. Chance seedling of Concord. Ripens in late September. Hardy to -15°F.
PRICE	Seeded. One of the best varieties for the cool Pacific Northwest, with less heat requirements for ripening. Produces many small clusters of medium sized, near-black fruit with a sweet, pure flavor devoid of muskiness. Ripens 21 days before Concord, hardy to -10 degrees.
STEUBEN	Seeded. Bluish-purple fruit that is tender and sweet. Great for eating fresh or for making wine.
SUFFOLK RED	Seedless. Very hardy and productive with meltingly soft, sweet, delicious fruit best for fresh eating.
VANESSA	Seedless. Vigorous, moderately hardy vine that produces loose bunches of medium sized, deep red fruit with spicy, aromatic flavor. Excellent quality.
