

# APPLE POLLINATION

- An apple variety can generally be pollinated by any other variety **in the same column or in an adjacent column.**
- Apple varieties marked with an ‘S’ are partially self-fertile varieties that will often produce enough fruit for the home gardener. A second tree to enhance pollination will increase production.
- Sterile pollen varieties are marked with a “T” for triploid. Sterile varieties must be pollinated by a variety that is not sterile. They cannot pollinate another variety, so it is best to choose a self-fertile variety for pollination.
- Crabapples can also pollinate apples as long as they bloom at the same time. Information on four varieties has been provided.

EARLY	EARLY - MID	MID - LATE	LATE
Chehalis - S	Arlet	<b>Akane</b>	<b>Fuji</b>
Discovery	Cortland	Arkansas Black - T	<b>Granny Smith-S</b>
Garden Delicious-S	Empire	<b>Braeburn - S</b>	Northern Spy
<b>Gravenstein-T</b>	<b>Fireside</b>	<b>Cox Orange</b>	Red Fuji
Grimes Golden - S	Freedom	Criterion	Roxbury Russet
Pink Pearl	Golden Russet	Elstar	
Scarlet Surprise	<b>Jonathan</b>	<b>Gala - S</b>	
<b>Spartan-S</b>	<b>Liberty</b>	<b>Golden Sentinel</b>	
Sunrise	Lodi	<b>Honeycrisp</b>	
Swiss Gourmet	Mc Intosh - S	<b>Jonagold - T</b>	
<b>Yellow Transparent</b>	Mutsu - T	King - T	
	<b>Pink Lady</b>	Melrose	
	Prima	<b>Northpole</b>	
	<b>Royal Gala</b>	Red/Yellow Del.	
	<b>Spitzenburg</b>	Red Rome - S	
		<b>Scarlet Sentinel</b>	
<b><u>CRABAPPLES</u></b>	<b><u>CRABAPPLES</u></b>	<b>Wealthy</b>	
Dolgo	<b>Firecracker</b>	Winter Banana - S	
<b>Whitney</b>	Young America	Winesap - T	

**Note:** We anticipate stocking the varieties highlighted in **BOLD** print in spring of 2008. The others are listed for assisting those trying to match pollination requirements with existing apple trees.
